Subject: Textile Recycling Bags

Good afternoon

I am circulating this email to several Parish Clerks across the district to enquire whether you would be able to assist us in expanding the number of outlets throughout the district where local residents can conveniently obtain replacement or additional Textile Recycling Sacks for use with the kerbside recycling service.

The bags are freely available to the public; however, rather than handing out entire rolls, we suggest that these are handed out either singly or in small numbers, thus keeping the storage burden to a minimum. Replacement stock would be supplied by us on request.

If your Parish Council has a local point that would be able to hold a supply of these bags, and that members of the public are able to visit for the purpose of obtaining these bags, please advise me and I will arrange to provide you with a supply of these. In addition, if you are willing to be added to the publicised list of Textile Bag Collection Points throughout Suffolk <http://www.greensuffolk.org/assets/Recycling/New-Textiles-Scheme/130226-Replacement-Textile-Bags-Collection-Points.doc>, please advise.

I would note that Parish Councils' participation is entirely optional. However, if the Parish Council does not have a suitable point of its own that is able to participate, but is aware of any other community centre in the Parish that may be willing to do so instead, please feel free to forward this email on.

Please do not hesitate to contact me should you wish to discuss in more detail.

Yours sincerely,

Daniel
