Ref:	Appendix B1-REVIEW1: Schedule of trees, work recommendations and priority timescales.					Weather: Clear and bright				
Survey Date:	13th September 2022					<div>Notes:</div> <div>1: Comments and updates from latest survey are shown in blue.</div> <div>2: Identifying trees for work on site: Trees have been marked with an orange spray mark discreetly at base of tree or on ivy stem.</div>				
Client:	Melton Parish Council									
		Estimated (metres)								
Tree/Gp Number	Species	Height	Crown Spread	Life Expectancy (years)	Age Class.	Tree Problems/Comments.	Safety significance and recommendations	Action/work required on safety grounds	Work Priority	
Site	Hall Farm Road: Survey date 13th September 2022									
1	Fraxinus excelsior (Common Ash)	14	14.0m	10 + years	Fully mature	OVERALL CONDITION Fair . Condition remains Fair. No deadwood to speak of on ground and only minor twiggy deadwood in tree. No evidence of Ash Dieback Disease. Leaf cover 70%, good for an old ash tree.	No significant safety issues	No action required	—	
2	Fraxinus excelsior (Common Ash)	9	7.0m	20+ years	Young	OVERALL CONDITION good - Improved since last inspection. Crown leaf cover 90% of normal for species. No sign on stems of ash dieback.	No significant safety issues	No action required	—	
3	Fraxinus excelsior (Common Ash)	10	7.0m	20+ years	Young	OVERALL CONDITION Fair -Condition remains Fair as since last inspection vandalism to stem has created a wound approx. 320mm x 200mm. Response callus growth good Probably two seasons growth. No significant safety issues however may not be healed over with time. Crown leaf cover 80% with no sizable deadwood. No sign on stems of ash dieback.	No significant safety issues.	No action required	—	
4	Carpinus betulus (Hornbeam)	11	6.0m	100+ years	Young	OVERALL CONDITION Good - No change in condition since last inspection	No significant safety issues.	No action required	—	
5	Alnus glutinosa (Common Alder)	15	20.0m	20+ years	Veteran	OVERALL CONDITION Good. Wide spreading form with all five large stems healthy. Very impressive tree with dense healthy leaf coverage.	No significant safety issues.	No action required	—

		Estimated (metres)								
Tree/Gp Number	Species	Height	Crown Spread	Life Expectancy (years)	Age Class.	Tree Problems/Comments.	Safety significance and recommendations	Action/work required on safety grounds	Work Priority	
G1	Mixed broadleaf mostly young and maturing goat and crack willow, plus holly, wild plum, hawthorn, dogwood & buddleia in dryer areas.	—	—	Various	Mixed	Access reasonable to most areas as pond currently dry. Trees all look very healthy, probably due to retained moistier in ground. Although some trees overhang property boundaries. No evidence of recent resident pruning nor antisocial behaviour.	No significant safety issues.	No action required	—	
G2	Mixed broadleaf 3 x Cambridge gage and 2 x quince.	—	—	—	Newly planted	OVERALL CONDIRION Good. All five young fruit trees are doing well.	No significant safety issues.	No action required	—	
G4	Mixed broadleaf 9 x young trees Hornbeam, Hawthorn & wild plum	—	—	—	Young	Group taller (tallest 6m) than at last inspection with no sign of recent resident intervention.	No significant safety issues.	No action required	—	
Site	Hall Farm Close: Survey Date 13th September 2022									
G3	Mixed broadleaf including field maple hawthorn & holly	—	—	—	Young/mat uring	CONDITION Good. No sign of further intervention although I think the 6 m high tree reported in last inspection has been felled as there is a field maple resprouting from a stump. Area is now very dense, fairly impenetrable wildlife haven,	No significant safety issues.	No action required	—
