11	Common Beech (Fagus sylvatica)	15.0m	15.0m	5 + years	Fully-Mature	OVERALL CONDITION Indifferent - Holly and undergrowth around tree too dense to access base but partially visible from path. Visible parts sound. Crown looks to be slightly sparse in upper parts of tree.			Sparse crown unlikely to be significant in terms of safety however, clear around base before next inspection to allow for closer assessment of tree base.	<b>Clear holly from round base of tree to allow for full inspection</b>	<b>Within 12 months</b>
12	Sycamore (Acer pseudoplatanus)	20.0m	14.0m	20+ years	Fully Mature	OVERALL CONDITION Fair - No change in condition since last inspection.			No significant safety issues	No action required	-
